PROFESSIONAL SUMMARY

Senior Mobile Engineer with 7+ years building and shipping 10+ production iOS and Android applications across fintech, insurance, sports, and e-commerce — collectively 1.1M+ downloads and 20K+ ratings averaging 4.3+. Arabic-native with direct Gulf-market delivery (Al Rajhi Takaful) and Arabic RTL localization. Specialized in Flutter, Dart, Clean Architecture, BLoC state management, secure financial flows, and CI/CD automation (CodeMagic, GitHub Actions, Fastlane). Proven record of hands-on technical leadership: leading mobile teams, mentoring engineers to senior, shortening release cycles, and raising app-quality metrics for products used by hundreds of thousands of customers.

CORE SKILLS

Mobile Development: Flutter 3, Dart 3, Android SDK, Java, Kotlin & Swift (native platform integration), cross-platform development, white-label / multi-tenant apps (Android product flavors, iOS schemes), push notifications (FCM), deep links, Google Maps, app security (SSL pinning, code obfuscation)

Architecture: Clean Architecture, MVVM, SOLID, Dependency Injection, Design Patterns, offline storage (Hive, SQLite, Isar)

State Management: BLoC, Riverpod, Provider, GetX

Localization: Arabic RTL, internationalization (i18n), localization (l10n)

Payments & Monetization: RevenueCat, in-app purchases, subscriptions, Apple Pay, Google Pay, native payment SDKs, payment gateway integration

Testing & Quality: Unit, Widget & Integration Testing (strong unit and widget test coverage), flutter_test, mocktail, bloc_test, very_good_analysis, code reviews

CI/CD & Release: CI/CD, CodeMagic, GitHub Actions, Fastlane, Firebase App Distribution, App Store Connect, Google Play Console

APIs & Networking: RESTful APIs, GraphQL, Dio, Retrofit, Socket.io, WebSocket

AI-Assisted Development: Cursor, Claude Code, GitHub Copilot, ChatGPT, Gemini — spec breakdown, scaffolding, BLoC/test generation, code-review augmentation

Tooling & Monitoring: Firebase, Sentry, Git, Figma, Adobe XD

Methodologies: Agile/Scrum, Sprint Planning, Technical Leadership, Mentoring, Code Reviews

PROFESSIONAL EXPERIENCE

Senior Mobile Engineer (Flutter) — NTG (Client: Al Rajhi Takaful ↗)

05/2025 – Present

- Developed and enhanced 8+ user-facing modules (policies, claims, digital services) in Al Rajhi Takaful's flagship insurance app — 1M+ downloads and 20K+ rated users on iOS and Android.
- Translated 30+ complex insurance requirements into intuitive Flutter UI flows with product, backend, and QA, cutting requirement-clarification cycles ~40%.
- Hardened performance, stability, and security of customer-facing financial flows, sustaining a 4.3–4.4 store rating across 20K+ reviews.
- Integrated AI-assisted tooling (Cursor + Claude Code) for module scaffolding and BLoC test generation — ~30% faster feature implementation at a <1% post-merge defect rate.

Senior Mobile Engineer (Flutter) — Mozare3 ↗

12/2023 – 05/2025

- Led delivery of core mobile features (e-wallet balance, in-app commerce, analytics) for the Farmer App, supporting 10K+ active farmers and increasing field-force throughput 25%.
- Re-architected the legacy codebase to Clean Architecture + GetX, cutting average screen load time ~35% and crash-free-session regressions to <1%.
- Designed and shipped CI/CD pipelines (CodeMagic, Fastlane) that reduced release time from 2 days to under 30 minutes per build.
- Hardened security on user and financial data (token rotation, encrypted local storage, Sentry), driving production crashes down 60%.

Senior Mobile Engineer (Flutter) — MakanE ↗

01/2023 – 12/2023

- Led the revamp of 2 high-traffic apps (Qoodz, Qoodz Manager) from monolithic code to BLoC + Clean Architecture, lifting App Store rating to 4.4 and redemption-flow completion 20%.

- Stepped in as de facto mobile lead for a team of 4 mid-level Flutter engineers: structured code reviews, pairing and mentoring via weekly 1:1s — promoting 2 to senior within the year.
- Implemented native iOS/Android integrations (camera, NFC, payment SDKs) where Flutter plugins fell short, unblocking 5+ feature releases.
- Established review standards and linting (very_good_analysis) that reduced post-merge bug reports ~30%.

Software Engineer (Flutter) — Openner.vc ↗
06/2021 – 01/2023

- Built an investor-facing mobile app from scratch in Flutter/Dart, shipping MVP to TestFlight and Play Console within 14 weeks.
- Owned schedules and sprint planning across a 4-engineer team, delivering 100% of releases on time across 12 consecutive sprints; lifted onboarding completion 18%.

Software Engineer (Android, Flutter) — Watanya Company for Roads
05/2020 – 06/2021

- Developed an industrial Android ticketing app in Java for toll-road operators, processing thousands of daily transactions across multiple stations.
- Benchmarked Flutter vs. React Native and led Flutter adoption, cutting parallel-codebase maintenance ~50%.

Software Engineer (Android, Flutter) — Dexef ERP System ↗
02/2019 – 05/2020

- Designed 20+ reusable UI components and integrated 30+ REST endpoints, accelerating new-screen delivery ~40%; optimized ERP latency 35%.
- Revamped 2 legacy native Android apps to Flutter, cutting codebase size ~45% while improving iOS/Android parity.

KEY PROJECTS

- **Al Rajhi Takaful — Insurance & Digital Services** · 1M+ downloads · 4.4 App Store (4.1K) / 4.3 Google Play (19.9K). Policy, claims & digital-services modules. Flutter, BLoC, REST, Clean Architecture · iOS, Android App Store ↗ · Google Play ↗
- **Digital Hockey — Sports Fan App** (HC Ambrì Piotta) · Built as a white-label app — multiple branded builds from one codebase via Android product flavors and iOS schemes. Real-time chat & live updates via Socket.io (+30% match-day session length); RevenueCat IAP/subscriptions. Flutter, BLoC, Socket.io, RevenueCat, Go Router · iOS, Android App Store ↗ · Google Play ↗
- **Qoodz — Dining Discount Network (UAE)** · QR redemption +20%, ~35% faster cold start, Sentry crash-free >99%. Flutter, BLoC, Firebase, Payment Gateway · iOS, Android App Store ↗ · Google Play ↗
- **Qoodz Manager — B2B Partner Redemption App** · Redemption flow 5→2 steps (~40% faster); 8+ partner features used daily by 100+ outlets. Flutter, BLoC, Firebase, Dio · iOS, Android App Store ↗ · Google Play ↗
- **InGame — Gamified Football Platform** · 100K+ downloads · 4.5 Google Play (2.1K). Led a 3-engineer team to launch, zero P0 in month one; GraphQL + REST. Flutter, BLoC, MVVM · iOS, Android App Store ↗ · Google Play ↗
- **Farmer App — Agri-Fintech (Mozare3)** · 10K+ downloads. E-wallet, checkout, analytics, CI/CD for 10K+ farmers. Flutter, GetX, Dio, Retrofit, DI · Android Google Play ↗
- **Mozare3 Partners — Field-Force Task App (Mozare3)** · Used by Mozare3 field force to submit periodic tasks; custom animations for an engaging UI. Flutter, BLoC, Clean Architecture, Dio · Android Google Play ↗
- **Dexef Bills — Cloud-Based POS** · Real-time inventory/transactions on REST (1K+ daily/merchant); offline-first sync. Flutter, Dart, REST · iOS, Android App Store ↗ · Google Play ↗
- **Mahallat Jo — Deals & Savings App (MakanE)** · Revamped and expanded the app for benefits, deals & savings across a merchant network; led new features incl. search and a notifications system. Flutter · iOS App Store ↗

EDUCATION, CERTIFICATIONS & LANGUAGES

B.Sc. Computer Science — Menoufia University (2015–2019) · **Android Developer Nanodegree** ↗ — Udacity

Toptal Network ↗ — vetted freelance Mobile Developer
